EDUCATION

- B.E. IT, Vasantdada Patil Pratishthan's College of Engineering, Mumbai (2023–2027) | SGPA: 9.39
- HSC (Bifocal Science), S.V. Joshi Junior College, Mumbai (2021–2023) | 71%
- SSC, Swami Vivekanand Vidyamandir (2021) | 91%

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, Python, SQL, C
- Frontend: HTML5, CSS3, React.js
- Backend: Node.js, Express.js, Flask, REST APIs
- Database: MongoDB, MySQL (JDBC)
- Machine Learning: Model Training Basics, Prediction Systems, Data Handling
- Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, PyCharm, IntelliJ IDEA, Canva

EXPERIENCE

Full Stack Developer Intern (Project) – Sapphire Infocom Pvt. Ltd.

EduRights: Gamified Legal Awareness Platform (SFT-WEB-2025-042) | MERN (React + Vite, Node.js, Express.js, MongoDB Atlas)

- Built EduRights, a gamified learning platform to spread awareness about children's rights through modules, quizzes, and interactive games, with progress tracking, points and badges.
- Developed the project using the MERN stack (React + Vite, Node.js, Express.js, MongoDB Atlas) with JWT authentication, quiz score storage, and dashboard updates through REST APIs.
- Deployed the application (Frontend: Vercel | Backend: Render) and gained hands-on teamwork experience using GitHub (branches, merges, conflict resolution) while solving real issues like CORS and API integration.

Live: <https://edurights.vercel.app/>

PROJECTS

Virtual Banking System (GUI Based) (Java, JDBC, MySQL)

- Built a GUI-based virtual banking system with separate Admin/User dashboards, supporting money transfer, withdraw, and passbook (transaction history). Integrated MySQL using JDBC to securely store and fetch user accounts and transaction records in real time.

FridgeChef – Recipe Generator Web App

- Created a recipe generator website that suggests recipes based on ingredients entered by the user. Integrated external API calls to fetch recipe data and displayed results with a clean, easy-to-use UI.

Background Remover Tool

- Built a background remover tool using basic image processing techniques with OpenCV and PIL. Automated background removal for images and generated cleaner outputs for further use or editing.

Diabetes Prediction System

- Built and hosted a diabetes prediction web app by integrating a trained ML model with a Flask backend. Designed a simple web interface to take health inputs and display prediction results in a clear and user-friendly way.

Spam Detector with Email Fetch Feature

- Developed a spam detection system that classifies emails as spam or not spam using an ML model. Added a feature to fetch recent emails from my inbox and automatically check their spam status through the application.

CERTIFICATIONS & ACHIEVEMENTS

- Smart India Hackathon (SIH) 2025: Team NIRMAAN shortlisted in Top 50 (Internal Hackathon) | 2025
- Machine Learning – Success Classes of Engineering | 2026
- MERN Stack – Success Classes of Engineering | 2025
- Java Programming – Success Classes of Engineering | 2024
- JPMorganChase – Software Engineering Job Simulation (Forage) | Dec 2025
- IBM SkillsBuild – Project Based Learning Program (Agentic AI) | Aug 2025
